

## New and Improved Neocate® Infant DHA/ARA

Dear Healthcare Professional,

As part of Nutricia North America's commitment to specialized nutrition we are continuing to make improvements across our Neocate family of products providing your patients with the best possible nutritional support according to the latest medical and scientific knowledge. Starting mid-August, we are very excited to announce the availability of a new and improved Neocate Infant DHA/ARA.

### What are the improvements to Neocate Infant DHA/ARA?

- Optimized nutrient levels to better meet nutrient needs based on current science
- Compositional enhancements inspired by breast milk including the addition of nucleotides and increased DHA
- Decreased osmolality providing the lowest osmolality in an elemental infant formula
- Soy oil removed making Neocate Infant DHA/ARA the only elemental infant formula that does not contain soy oil
- Increased volume per can with lowest patient out-of-pocket cost
- Simplified 1:1 mixing with easy and flexible serving sizes
- Halal certified

### How can I identify improved Neocate Infant DHA/ARA?

The new and improved Neocate Infant DHA/ARA can label has exciting new graphics making it both clear and simple to read but also improved differentiation between our infant and junior products. In addition, over the next few months, a sticker will be placed on the new Neocate Infant can lid informing caregivers that the product is new and improved with new easier mixing instructions to follow. Specific availability in each local area may vary.

Please note, there have been *no* changes to product codes.

We understand the sensitivity of the infants and children who rely on our products; therefore we have prepared support materials and a transition guide for our customers that can be found at [Neocate.com](http://Neocate.com). Please contact us for help and support with communication to your patients. Our team of Nutrition Specialists is also available to help at (1-800-Neocate or 1-800-365-7354, option 2).

Neocate Infant DHA/ARA continues to be the same trusted hypoallergenic, amino acid-based formula suitable for the dietary management of cow and soy milk allergies, multiple food protein intolerance, eosinophilic esophagitis, short bowel syndrome and other conditions requiring an elemental diet. We look forward to bringing you the best clinical nutrition products. If your patients have any questions, please direct them to our Nutrition Support Department toll-free at **1-800-365-7354** or visit [Neocate.com](http://Neocate.com).

Sincerely,  
Neocate's Specialized Pediatric Team
